

Loos, Eudolf
[Geraberg, Thuringia]

November (?) 17, 1931

[Have you already in your possession the very seldom [rare]
tokens of Nürnberg/Fürth? If not, then please write me
at once.]

[Letter is stuck to the envelope flap, but is
still readable, scannable.]

Have you already in your possession the very seldom tokens of Nürnberg/Fürth if not, then please write me at once, if you like to secure the one or other set. You will find a breif description of these tokens below :

In the ancient town of Nürnberg/Germany were struck in 1921 three different very seldom tokens. Two show a street scene on the reverse and the face reads Ludwigs Eisenbahn (the first railway in Germany) Nürnberg to Fürth. value 100 and 150.- The other is the same except it is 200.- These tokens are a good deal larger than a quarter, about half again as large. The issue was very small so that only a few sets are still on stock. The price for the complet set = 3 different types= is \$ 0.60

But there were also issued 45 different tokens, viz, the seldom street-car-tokens of Nürnberg-Fürth, Germany, Street Railroad, issued since the great war, are bothe attractive and very interesting. They are made of aluminium or similar metal, of octagonal shape, about the size of a quarter, with a common observe. They are all 20 Pfennig and in best condition, not bent. Nürnberg and Fürth are 2 big towns in Bavaria, Germany, and the railway connects them.

The complet set consists of 45 different types. Each has a different reverse. These reverses show different street scenes, fountains, castles, and a portrait of a national character. One of them shows the monument of Albrecht Dürer, the famous printer, another the monument of Peter Henlein, the inventor of the watch, ect.

This set costs \$ 2.00, please write to Mr. Rudolf L o o s in Geraberg
in Thuringia, Ilmenauerstr.43
Germany.

Rudolf Loos, Geraberg/Thuringia, Almenauerstr.42
